

北岸進修學院本年度再增添 135 名學生考獲獎學金, 精英學位及大學入學試最高成績! WE PROUDLY WELCOME OVER 135 NORTH SHORE STUDENTS RETURN IN VICTORY!

On the 18th of May, more than a hundred of students and guests gathered at the Assembly Hall of North Shore College at 288 Stirling Street, to celebrate proudly the outstanding academic success of North Shore. The Principal, Mr Bill Ng was delighted to announce that North Shore had another brilliant year in Perth, with an admirable number of over 135 students winning Scholarships to Prestigious School and Gifted & Talented Selective Programs to Government Schools, achieving Top Marks in

ICAS or being in Top 1% ATAR in 2020. There were many touching moments. One of those was when our North Shore WA State Principal, Mr Bill Ng asked all students to stand up and express deep appreciation to their parents by saying "Thank you Mum and Dad, thank you, I love you..."

Dr Shakeel Mowlaboccus, our renowned Lecturer expressed, "It is an honour for me to work with the WA North Shore team ... I am proud to say that the students

at North Shore show deep interest in their studies and invest a lot in them. They not only receive the appropriate knowledge in the most effective way but also acquire the qualities necessary for being good citizens of tomorrow"

Many talented students are excited to express their thankfulness to North Shore for being the foundation of their proud achievements.

Please log on to www.bit.ly/NS-WA-Photos to see their unforgettable photos.

Principal of North Shore TEE / ATAR / GATE Success College (WA) – Mr. Bill Ng

Thank you, Toni
Good evening Students, Colleagues & Honourable Guests! Welcome to our Annual Awards presentation. This year we have over a hundred & 30 triumphant receiving awards. Winning scholarships and/or the GATE Placements; attained top score in the Atar or Icas is a remarkable achievement and you should be justifiably proud. To congratulate our brilliant high achievers here today, please join me to give a round of applaud to all of you. These accomplishments are amazing returns for your parents' devotions and your efforts; it also proves that you have the potential to thrive. Although, it's just the beginning of more challenges to overcome for ensuring continual success in your life. Today, I would like to pose some questions to you and share my thoughts on them. First: What drives you to get top mark & achieve excellence in your further studies? Second: What's the most important thing you can do to realize your goals? Lastly: How can you enjoy your life better? To address my first question, what drive top mark and excellence? Clearly, there are many fundamental

factors such as personal health, favourable living conditions & environment,... for example, the current Coronavirus pandemic has been affecting your overall performance; nevertheless, some other crucial criteria such as high intelligence, Self-discipline; determination and hard work will directly influence your opportunity to obtain top mark in your exams.

Intelligence is something inherent, that we can hardly organize to improve & gain superiority over.

Self-discipline and determination is the personal trait that could be cultivated and nurtured by parents; families & friends, to certain extent it could rely on your upbringing and that is in general difficult to change... So, obviously, hard work is the only factor that, if you wish, you can manage and control. As you know, nowadays, enormous information is available on the internet, you can easily find stories of individuals from all walks of life, either healthy or handicapped, they talk about how they strive to survive despite many obstacles in their life. They develop to be very successful and outstanding through pure determination and consistent practices.

There is a Chinese saying: "台上一分鐘, 台下十年功" that means "Peoples need 10 years of practice for a successful 1-minute talent-show on stage". No matter where you come from, no matter how bright you are, if you want to be outstanding, you need to be determined and willing to work hard.

However, hard work is not merely rote repetition; you need to do something smart

An exam is not testing what you can simply remember, but it tests how you apply what you have digested and mastered. Majority of students can only memorize information and instructions, in contrast, top performers can also analyze and evaluate, they can develop arguments; they can get what the examiners want to observe from the exams.

North Shore Coaching College receives many thank you letters and compliments every year. In fact, most of our new students are introduced by our highly satisfied students; parents and teachers. For this, please accept my sincere gratitude to all of you for your trust and support.

Here I won't forget to extend my thankfulness to all our Teachers and Colleagues who sacrificed their Weekends to work dedicatedly to stimulate our students to reach their highest potential. To show our appreciation to our diligent Teachers... Please stand up and give a thunderous clap... , please be seated.

It brings me to my last question tonight; how to enjoy your life better? You need to know the pursuit of happiness... A simple and effective way to make your lives better is to complete your university education and become an expert in a recognized profession, such as an Engineer, a Scientist, a Doctor, a Lawyer, an Artist or Educator etc. Then you can contribute to the community by giving your knowledge, your

expertise & skills, provide sound advice to influence and improve the lives of others. As a result, self esteem and satisfaction will make you more enjoyable.

Dear students, I would like to remind you that we are in a rapid revolving era with extremely competitive environment, computers & robots are being utilised to replace human beings for most repetitive tasks; such as various agricultural and Industrial work.

In this battle between human intelligence and artificial intelligence, it will be challenging for you to secure a preferable job post-graduation. Therefore, you need to acquire higher qualification, especially in Engineering and Scientific studies; build up an ingenious mindset and be more creative so as to keep in pace with the ever advancing new technologies.

However, with your exceptional educational foundation and the wholehearted support from parents, I have full confidence that you'll continue making every effort to achieve your goals and bring more happiness to your family and our society.

Now as you know your parents have been doing all their best to help achieving your success. Rather than keeping it in the bottom of your heart, express gratitude to your Parents. Please rise again and listen to me then follow loudly: 'Mum and Dad I love you ... I won't let you down,... thank you Mum and Dad'Please be seated.

Without further ado, I would like to invite our popular lecturer Dr Shakeel Mowlaboccus, who is a very successful professional in medical microbiology, to say a few words, please welcome Dr Mowlaboccus. Thank you.

North Shore Renowned Teacher (WA) – Dr. Shakeel Mowlaboccus

Director of the school, Principal, Teachers, Non-teaching staff, Students, Invited guests, Distinguished ladies and gentlemen, Good Evening.

It is a privilege to have the opportunity to address you today.

As mentioned by the Master of Ceremony, I am Dr Shakeel Mowlaboccus but all of my students know me by the name of Shaxx. I have been teaching at North Shore since 2009 and I am proud to be part of this prominent institution where the students have all the qualities to be great citizens of tomorrow. These are honesty, integrity, good morals and, most importantly, being always thirsty for more knowledge. I must also acknowledge that it is an honour for me to work with the WA North Shore team which is led by Mr and Mrs Bill Ng whom I have utmost respect for.

As a teacher, it is my duty to ensure that the students at Northshore not only receive the appropriate knowledge in the most effective way but also acquire the qualities necessary for being good citizens of tomorrow. Not only do we train them

to pass with flying colours but we also coach them for being humble, honest and sincere human beings as they grow up. And I must thank all you parents for trusting us in shaping your children not only academically but morally as well.

Being a successful research scientist and an academic, I always invest a lot of time and work hard to achieve the results I want from my work. And I am proud to say that the students at North Shore are no less – they show deep interest in their studies and invest a lot in them. I must admit that my 2018 batch of students were one of the best I have had so far in my teaching career. I would in particular mention some students who have constantly given an outstanding performance in my 2017 classes – YueQi Lin, Ashton Lau, Abhimanyu Bisht, Christopher Zhu, Jennifer Weng, Sherilyn Poon, Sophie Shan, Nicholas Michelin, Matthew Wong, Aaron Xu, Jordan Vuong.

Ladies and Gentlemen, in conclusion, I would like to seize this opportunity to congratulate all prize winners today for their splendid performance. It is, indeed, a moment of joy to be recognised for one's contribution to the development of the School. I urge all non-prize winners to also work harder and emulate the achievement of award winners and help uplift the image of the School.

I wish you all the best for successful years ahead. Thank you.

WE PROUDLY WELCOME OVER 135 NORTH SHORE STUDENTS RETURN IN TRIUMPH!

From left to right: Mr Emmet Kwan, Dr Terence Law, Mrs Heidi Law, Mrs Lisa Miu, Mr Raymond Miu, Nivethiha Manoharan, Zihan Zhang, Taranvir Singh Kular, Ishaan Kanodia, Mr Bill Ng, Ms Toni Ross, Mrs Iris Ng, Mrs Debbie Yeoh, Mrs Adeline Ng, Mr Benjamin Ng, Dr Shakeel Mowlaboccus

Taranvir Singh Kular – Top 1% ATAR High Achiever

Hello, distinguished staff, parents and students.

I want to firstly thank the people responsible for my success over the years. Without them, I would not be where I am today. I want to show gratitude towards my parents, who have supported me, pushed me, and craved me into the person that I am now. They never gave up on me, even when I felt like giving up. I would also like to thank North Shore and its staff, especially Shaxx for pushing me to a level I never thought was possible. Shaxx has been my teacher and mentor since year 11 and without him I wouldn't have got a 99 ATAR. I remember when I received my ATAR score at around 3 in

the after afternoon. At 3:02 I was on the phone with Shaxx. I have never had a teacher as great and as awesome as Shaxx and I don't think I ever will.

A bit about me. My name is Taranvir Kular. I achieved an ATAR of 99.15, placing me in the top 0.85% of all participants in Australia. I have been a North Shore student since year 3 and am now a teacher at North Shore, trying to inspire students just like my teachers inspired me.

When I started North Shore in Year 3, I was by far not the smartest person in class. I struggled. The first couple of years were not easy, I had never seen problems of that style or that level and all I could do at the time was

simple arithmetic.

But I didn't give up. My parents made sure of that. They spent so much time outside of class, making sure I understood each and every problem and that I understood the concepts.

There is a famous quote by Kevin Dyrant.

"Hard work beats talent, when talent fails to work hard".

If you're doing well now then, that's great, keep working hard and you will keep doing well. If you're not doing well, then don't give up. There is always a chance and it's not over till YOU decide it's over.

And the best way to improve is to not just blindly copy down the answer, or blindly follow

a series of steps that will give you the answer. It is to UNDERSTAND the concepts. That is why you come to North Shore. You come to learn and enrich your UNDERSTANDING. What you're doing now, you are building a base. A foundation. A foundation for all the work and concepts you will learn in your future years, not just in year 11 and 12 but beyond that as well. If you understand what you do at North Shore, school and your tests will become much much easier. I know, I've done it, I've experienced it.

One final word of advice.

Don't chase success, strive for excellence. Success will automatically follow.

Thank you.

Ishaan Kanodia – Scholarship & GATE Winner

Good evening Mr Ng, parents, teachers and distinguished guests. My name is Ishaan Kanodia and I would like to thank Northshore for all the wonderful opportunities it has provided me with, that eventually led to me being accepted in Perth Modern School and receiving a scholarship to Christ Church Grammar School. Before I begin, I would like to applaud all of you here today, it means you have persevered through tough times and through hard work, have managed success.

I first came to north shore in year 4 and at the time I really didn't want to be there. Waking up early on a Saturday morning to spend 3 hours doing tuition that was harder than my schoolwork, this seemed really dull. To add to that, we got homework, to a ten-year-old all of this was seemed to be a nightmare. But after a few weeks I remembered getting my homework back and

on it was a B+. This was much better than the Cs I'd been getting. Up until that point, I could barely understand the topics, even after our teacher explained them in class. But at that moment, something shifted inside me, this wasn't torture, it was actually fun. North Shore helped me develop pattern recognition, problem solving and critical thinking skills, skills that would come in really handy for standardised testing and just life in general.

The teachers at north shore are passionate about what they teach and are all around sincere and hard-working people. They always give constructive and detailed feedback and visually show what you need to improve. They drive you to put in 200% of your effort in all of your tasks. This makes it that much more satisfying when you get a certificate because you knew that you

worked hard for it. Over time, as you collect more and more certificates, you can strive for higher and higher awards. You change from the mentality of just trying to get the 20-certificate trophy, to truly believing you can get one of the king 75 certificate trophies. When I first went up to the giant trophy, it looked daunting compared to the others. But as I got more and more certificates, the dream looked like a reality. I remembered one day I was counting my certificates, 76. I immediately rushed to the front counter and traded them in, that day I looked back on everything I had done at north shore, this was the first big achievement. It felt even more satisfying then winning the trophy for the best in the term as this was a 2-year endeavour where the end result took a long time to reach. This gave me motivation when I needed it most, because right after I received that, it was the gruelling

holiday program. For the last week of the summer holidays, you would spend the whole day doing practice tests and extra homework that was due the next day. It was safe to say this was a challenge. But somehow, I made it out better than I came in, this seemed to be a recurring theme at north shore.

I would like to thank my parents who helped and guided me along this journey at north shore, they have been truly supportive and wouldn't be here without them. The path you take at North Shore is like the one taken to climb a mountain range. The journey is long and it often hard to see where it ends, there are numerous ups and downs and many unexpected challenges. But once you come out the other side you surprise yourself with what you achieved and you come out as a stronger person.

Thank You!

Zihan Zhang – Scholarship & GATE Winner

Good morning parents, students and teachers. It is an absolute pleasure to be able to stand here today and share my experiences with you.

I am Zihan Zhang and I'm currently a Year 7 student at Perth Modern and was also awarded a scholarship at Methodist Ladies College. In sharing my roller coaster journey, I hope that you understand that life won't always go your way and you need to always try your best in any aspect of life.

Fortunately, I am the recipient of a scholarship at the Methodist Ladies College and also gained admittance to Perth Modern through GATE. Firstly, I would like to thank North Shore and all the staff and teachers who

are so dedicated in teaching the students and making sure every lesson is fun and enjoyable. North Shore has been a place where I not only developed academic skills but it also taught me how to be more social and make more friends.

My journey at North Shore started at Rossmoyne SHS school, when I was in Year 1, not knowing a single word in English. North Shore helped me overcome this. The first day I started, I was so stressed about the teachers thinking I would be an inconvenience to them and ignoring me. But it was completely the opposite, the teachers would just come and sit next to me and try to help me comprehend a word, question or even a whole text. The following years, after I have become a fluent

English speaker, I would still struggle in class but North Shore had motivated me to try my best every in every homework task, and also every test. In my years at North Shore I have received at least one Certificate of Excellence every time. After a few weeks, I made many new friends.

Every week, after North Shore ended, I would attend the support classes. At first I thought this class was just so I can finish all my homework and have more free-time while I was at home. I was so wrong. I needed help for most of the maths homework and then I realised, that North Shore is able to challenge me. Before the GATE exam, I participated in the Intensive Holiday Tutoring and I was really challenged by the questions we did. As well as getting

challenged, I was able to learn how to do these questions which were close to the level of GATE exam.

Lastly, I would like to thank my parents for supporting me throughout my journey at North Shore and encouraging me to do my best. North Shore is a great tutoring centre which has taught me to put everything towards not just maths questions but everything in life. Life is like a valley where you have to climb up, and try your best not to fall down the slopes, it will be hard to do this, but one day, when you are older, you will look back at the path you've taken and be astonished that you went that far, and persisted.

Thank you for your time.
Zihan Zhang

Nivethiha Manoharan – Gifted & Talented Winner

Good evening, distinguished guests, parents, staff and students. My name is Nivethiha Manoharan, and I am currently a Year 7 student at Perth Modern School. I am very honoured to be here tonight.

First of all, I would like to congratulate you all on your achievements. Make sure to sit back and relax after all that hard work!

Next, I would like to thank North Shore for helping me throughout these past years. I have been at North Shore since Year 1, and North Shore has helped me with many things, such as Science, English, Maths and Creative Writing. North Shore has taught me to think outside the

box whenever necessary, and to work hard with determination. Without North Shore, I never would have achieved the role of Head Girl, and the DUX Award at my primary school.

Another positive aspect was the hard-working teachers at my Campus, and I can't thank them enough. They have always explained every single question deeply, which meant I learnt a new thing every Saturday. Whenever they marked my homework, they would tell me why I got a specific question wrong, or how I could improve the answer. I would always check for comments at the bottom of the page in Writing and English, and I would

take it into mind whenever I wrote another essay.

Another thing I would always look forward to at North Shore were the encouragements, such as the little multi-coloured certificates that you could earn, and that if you earned a certain number of them, you could achieve a medal or a nice trophy. I, myself, have many of those trophies at home. North Shore also gives out trophies at the end of term, for those who have worked hard during class time and gets good homework results, also for achieving great term test results. This always encourages me to do better in my weekly homework and term test. It

also motivates me to participate more actively during class time.

I would also like to thank my parents, who have supported me throughout these years, and encouraged me to do more better every time. Thank you mum and dad! I couldn't have done it without you!

Finally, I would like to finish with a quote by Michael Josephson, a former law professor, "Life never stops teaching, be sure you never stop learning"

Thank you all for sitting so patiently and listening to my speech, and I wish you all the best in the future.
