

Lynwood Campus' Speaker: Daisy Wu

Good evening guests, parents, teachers and students

My name is Daisy Wu. I'm very honoured and pleased to be here delivering my speech. I got the scholarships to St Hilda's Anglican School for Girls, Presbyterian Ladies' College, and an offer from Perth Modern School. I'm currently in Year 7 at St Hilda's Anglican School for Girls.

To start off with, I would like to congratulate all the students for putting in lots of hard work and effort in order to achieve these accomplishments. Today is finally the day you can relax, celebrate your success and feel proud for yourself!

When I was younger, I was considered as one of the worse-than-average type of students in my class at Willetton Primary School. One day, during the near end of Year 4, I came home crying because I couldn't understand anything in PEAC, and I got really frustrated. After a while, my parents enrolled me in North Shore. Ever since, I started North Shore in Year 5, everything started to slowly improve.

All the teachers at North Shore are extremely friendly. They will motivate their students and encourage them with little awards. Also, they always help with your weak points and try to help you as much as possible. North Shore also taught me new things that you probably won't learn until a year later at school. As a result, my grades got better, I found school easier, and I became one of the smarter students in my class.

Before the GATE and scholarship tests happened, I went to the North Shore Holiday Program three times. The program really helped as I learnt time management during a test, and what the test is like through a mock test.

During the later terms of Year 5, North Shore also had weekly in-class GATE mock tests training. This was very good because I can tell how I was fully prepared for the GATE test.

Finally, I would like to thank my parents, North Shore and all the friendly staff there. Without the help of them, I would have never reached my goal and get into my dream school. Thank you for listening so patiently to my speech.
